

SOUPS and BROTHS

Please be advised that our soup selection changes frequently. Because of this, we have found it to be counterproductive to list all of them on a carryout menu, like the one you are currently holding in your hands. With that being said, listed below are the soups that we will for the most part, always have available in house. As for the remainder of our continuously growing repertoire of soups, please call ahead (phone numbers are at the end of this menu), or jump on the nearest computer and peruse our website (www.thesoupermarket.com) to find the soup that will best satisfy your craving. In the meantime, read on for everything else we have to help alleviate your hunger pangs, while simultaneously tantalizing your taste buds! This menu should be used as a point of reference only.
